

PRELIMINARY ASSESSMENT RUBRIC FORM

SITE NAME: TRW/JH Williams Division

ALIASES:

ADDRESS: 400 Vulcan Street, Buffalo N.Y. 14207

CITY: Buffalo

COUNTY: Erie

STATE: NY

PRIORITY RATING GIVEN: (BY STATE OR CONTRACTOR) Low

AGREE:

DISAGREE:
(CHECK ONE)

IF DISAGREE, WHY?

OTHER COMMENTS: Site Status: Inactive (since 1985)

Site Description: Steel mill which used to manufacture tools using a cyanide plating process. Cyanide and a heavy metals sludge were found, at one time, to be entering the city sewer system. There are underground storage tanks located close to the Niagara River. (1 mile west of the site). This river is the main drinking source for Erie County, by approximately 111,881 people. The NYDEC listed the site as cleaned up at the time of its closure. Possible metals and cyanide may still exist in the soil, and present a threat to the population and environment.

RECOMMENDATIONS:
FINAL (BY EPA)

Low priority. A site inspection should be done to determine if any contaminants still remain on site.
